PTFE-Spray

PTFE-SPRAY

- A colourless lubricant, sliding and separating agent for metals, rubber, plastics and other materials.
- Resistant to temperatures from -50°C up to +260°C.
- Grease free, anti-adhesive, dirt, dust and water repellent.
- Can be applied almost universally:
 - electrical technology and machines,
 - plastic processing,
 - paper processing,
 - textile industry, etc.
- Guarantees long-lasting lubrication and protection.
- Prevents wear and tear and caking.
- Removes friction, hooking, squeaking and creaking noises.
- Strong capillary action and excellent flow properties.
