Rust Primer

RUST PRIMER

- Stops corrosion on ferrous metals and serves as an all-purpose adhesive agent for lacquers.
- Can be applied on rust that has become firmly stuck.
- Has a smooth, non-porous and particularly non-abrasive protective layer.
- Corrosion and temperature resistant (short period up to +150°C). Resistant to water, salt water, petrol and most aggressive chemicals.
- Lead-free, non-toxic and acid-free.
