

Treblex Industrial Aerosol Products

Brake Cleaner

TBPC

- Treblex Brake Cleaner is made with a highly refined, effective and also a safe solvent. This is unlike many other brake cleaners produced with solvents containing known carcinogens and/or neurotoxins.
- It is designed to quickly and safely dissolve and remove grease oil and contaminants from brakes, parts, slides and chains.
- It is ideal for use in DIY to heavy duty applications.
- It evaporates away not needing to be washed off like degreasing products.
- A large 600ml / 400g aerosol can gives value for money.
- Includes optional actuator and removable extension tube for blast effect.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 400g/600ml

Electrical Contact Cleaner

TCC

- Treblex Electrical Contact Cleaner is a technically superior, fast drying, non residual precision cleaner, made with a highly refined safety solvent.
- When used as directed it will quickly and safely remove contaminants from computer boards, contacts, switches and plugs.
- Ensure equipment is turned off as this formula is flammable. If a non flammable product is required use TREBLEX N.F.CONTACT CLEANER.
- Highly effective and economical.
- Low odour formula.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 350g/500 ml

Heavy Duty WD Lube

THDWD

Treblex HDWD is engineered to greatly exceed the performance of our competition in the following areas:

- Penetration - Contains Alox chemistry in higher quantities to outperform other specialist penetrants.
- Lubrication – Contains a quality lubricating oil in higher quantities for superior long term lubrication.
- Rust prevention - Contains Alox paraffinic wax anti corrosive protection.
- It has dewatering capability and is extremely resistant to sea water and salt spray.
- May be used as a "Soft Sealant" for storage of machined parts or tools to give a minimum of 12 months protection indoors.
- Many other WD lubes and penetrant products contain minimal quantities of these required components and therefore do not perform all of these functions as effectively.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 400g/500ml

N.F. Contact Cleaner

TCCNF

- Treblex N.F. Contact Cleaner is a technically superior, stable, inert, high purity cleaning solvent suitable for use in all electrical and electronic applications.
- This product has no flash point, is non flammable, non conductive and contains no lubricants.
- Safe to use on powered equipment.
- It is a highly effective, fast drying, non residual precision cleaning solvent.
- When used as directed it will quickly and safely remove contaminants from computer boards, contacts, switches and plugs.
- Large 450g can.
- Highly effective and economical.
- Low odour formula.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Check warning on can for care with some plastics.
- Size - 450g/500ml

Silicone Lube Plus

TSLP

- Treblex Silicone Lube Plus contains 15% silicone; most other brands contain less than 10%.
- The superior grade and the high silicone content in this product give it stronger film strength.
- These features enable the product to be more effective and long lasting; therefore it is more economical and requires less frequent application.
- Made with a highly refined safer solvent.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 350g/500ml

Treblex Industrial Aerosol Products

Marine Guard

TMG

- Treblex Marine Guard is a heavy duty, multi purpose, non flammable product.
- It provides superior lubrication and corrosion protection for exposed metal surfaces and exhibits good penetration ability.
- This marine grade product will help protect against damage caused as a result of exposure to fresh or salt water and salt spray and other extreme environments.
- It is an ideal product for use in high humidity, in underground mining and in the oil and gas industry.
- It uses non flammable CO₂ propellant making it safer to use in sensitive environments and also safer to store.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 350g/400ml

Open Gear Lube

TOGL

- Treblex Open Gear Lube is an extreme performance lubricant reinforced with 3% molybdenum disulphide (MOLY).
- It is designed to provide lubrication and corrosion protection and resistance to wear on all types of open gears including worm gears, crown wheels, rack & pinion and chains.
- It is extremely water resistant and it resists corrosion in severe environments.
- It can be applied to moving machinery.
- It sprays to deliver a thin flexible film that reduces noise and chatter.
- It does not retain dirt and foreign particles that can be abrasive.
- It is a blend of high load additives which give maximum protection against pitting and wear.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 360g/400ml

Electra Lube WD

TELWD

- Treblex Electra Lube WD is a non flammable, non conductive product that helps reduce downtime and maintenance costs in all electrical equipment.
- It improves electrical properties in all high voltage applications.
- It has superior anti corrosion protection and excellent penetrating properties.
- It is designed to perform as two products in one: as a lubricant or a protective shield or both.
- It can be used on powered equipment where a non conductive product is required.
- Can be easily removed for reapplication with Treblex Electra Clean or Treblex N.F. Contact Cleaner.
- Can be used to provide long term protection on electrical equipment, marine radios and circuit boards.
- Large 450g can gives value for money.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 450g/500ml

Battery Terminal Protector

TBTP

- Treblex Battery Terminal Protector is designed to give maximum protection against battery failure.
- It helps maintain electrical voltage performance by protecting terminals, brackets and cables from corrosion.
- It is formulated to provide a chemically balanced film that penetrates easily into all recesses in metal posts, clamps and wire for maximum protection.
- It has distinctive green colour to identify the areas of coverage.
- This product can be easily removed for reapplication with Treblex Brake Cleaner or Treblex Contact Cleaner.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 360g/400ml

Electra Clean

TEC

- Treblex Electra Clean is a highly effective general purpose cleaner for use on powered equipment as it has no flash point and is non flammable.
- It is non conductive and can be used in all types of cleaning electric motors and electrical equipment.
- It evaporates quickly to leave no residue.
- Economical in use.
- Electra Clean is a safe replacement for products containing carbon tetrachloride and other carcinogenic compounds.
- Larger 420g can gives value for money.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 420g/500ml

Treblex Industrial Aerosol Products

TAC2000

- Treblex TAC 2000 is an exceptional lubricant with superior synthetic polymer technology.
- It has a combination of superior extreme pressure, anti-wear and anti-corrosion properties.
- It has tenacious adhesive properties to resist fling off.
- It easily penetrates all linkages and cables to provide effective lubrication without leaving an excess of sticky residue to attract dust.
- It contains a highly refined, safe, non carcinogenic solvent.
- Low odour formula.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 400g/500ml

TTAC

Carburettor & Throttle Body Cleaner

TCTBC

- Treblex Carburettor and Throttle Body Cleaner is specifically formulated to quickly and easily dissolve deposits both inside and outside carburettors and throttle bodies.
- It is a highly efficient cleaner for removing sludge, grease, varnish and gums.
- It has a concentrated formula to ensure it is economical in use.
- It will not affect oxygen sensors.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 400g

Moly Chain Lube

- This product is reinforced with 5% molybdenum disulphide (MOLY) which is an exceptionally tough lubricant with extreme pressure qualities which allows for boundary lubrication under the harshest conditions.
- Treblex Moly Chain Lube is an extremely versatile lubricant and can be used on: Chains, Wire Ropes, Linkages, Slides, Rollers and Winches.
- It is extremely water resistant and it resists corrosion in severe environments including high humidity, fresh and salt water and salt spray.
- It protects and lubricates in temperatures up to 450°C long after other liquid lubricants have failed.
- It limits wear to treated surfaces by rapidly penetrating to reduce friction and thereby extending component life.
- It has excellent adhesive qualities allowing cushioning of shock loading and migration of lubricant into wear areas.
- Size - 400g/500ml

TMCL

Heavy Duty Lanolin

THDL

- Treblex's exciting new H.D Lanolin is a highly versatile, safe, and effective multi-purpose aerosol.
- 360° valve making the product useable upside down for hard to reach applications.
- A large 400g / 500ml aerosol can gives value for money.
- Ideal for numerous applications from simple DIY to the heaviest industrial applications.
- Examples of the broad spectrum of uses include:
 - Electrical & Electronic equipment. circuit boards, control boxes, switchgear, connectors, pumps, generators and micro-processing equipment in refrigeration equipment.
 - Anti-corrosion protection including marine radios.
 - Food manufacturing anti-corrosion protection on chains and conveyor belts.
 - Automotive protection including battery terminals, carriers, springs, twists locks, wheel hubs, wire cables, nuts & threads, door slides & hinges.
- Size - 400g / 500ml

H.D. Brake & Parts Cleaner

- Treblex new formulation H.D Brake & Parts Cleaner is made with highly refined solvents, alcohols, ketones and organic compounds all of which make this product an extremely effective and safe to use.
- H.D Brake & Parts Cleaner is unlike many other brake cleaners produced with solvents containing known carcinogens and/or neurotoxins.
- It is designed to quickly and safely dissolve and remove grease oil and contaminants from brakes, parts, slides and chains.
- It is ideal for use in the heaviest duty industrial applications.
- It evaporates away slower than our standard product allowing more time to work on heavy soilage. It does not need to be washed off like degreasing products.
- A large 400g / 500ml aerosol can gives value for money.
- It has a 360° valve making the product useable upside down for hard to reach applications.
- Size - 400g/500ml
