*White Grease*

## **WHITE GREASE**

- Long-lasting grease lubrication for highly-stressed bearings, spindles and guides in machines.
- Characteristics:
  - long term resistant to salt water,
  - temperature resistant from -30°C up to +120°C,
  - prevents rust formation and
  - adheres extremely well.
- Lubricates moveable parts and sliding surfaces.
- Suitable as a back-up lubricating grease on spotless lubricating points.
- Reduces the wear and tear on bearings, shafts, chains, chain wheels, brake hinges and locks.
- Saves costs on maintenance and lubricants by reducing the number of failures and repairs.
- Also suitable as a battery pole grease, a parting agent and preservative.
