Wire Rope Lube

DESCRIPTION

TREBLEX Wire Rope Lube is an outstanding, multi purpose wire rope lubricant, with Moly, for lubrication and protection of cables and wire ropes. Wire Rope Lube reduces friction and wear between the wires and strands of all cables. The coating on the exterior of the cable protects and lubricates and serves as a cushion between the cable and the sheaves or drums.

FEATURES

- 360° valve, use inverted if needed.
- Formulated with proprietary rust and corrosion inhibitors.
- No chlorinated solvents are used in this product.
- Low viscosity.
- Special wetting agents allow penetration to the core.
- Carrier evaporates leaving behind the tough semi fluid lubricant.
- Synthetic components ensure the product penetrates to the core and coats every wire strand.
- Residual film clings tenaciously to the surface and is not displaced easily by water.
- Remains effective in an extremely wide temperature range.

APPLICATIONS

- Wire ropes and cables.
- Link chains.
- Derricks.
- Cranes.
- Drag lines.
- Lubrication of open or semi enclosed gears and pinion guides and all sliding surfaces.
- Guy wiring.
- Cargo hoists.
- Aerial tramways.
- Logging equipment.
- Mining equipment.
- Mill machinery.

DIRECTIONS

- Shake can well before use.
- Spray evenly as required onto area to be treated.

NOTE: Whenever possible, Wire Rope Lube should be applied when the cable is flexing, such as when it is going over a sheave. This facilitates the penetration of the lubrication to the core and permits more uniform coating of the wire strands. It is also recommended but not essential to clean the cable before application.

SAFETY

Keep out of reach of children. Harmful if swallowed. Use with adequate ventilation. Read Material Safety Data Sheet before use.
