WHY LISTEN**TALK**?

SIMPLE & FLEXIBLE

ListenTALK is simple: Groups can be configured with the push of a button in the docking station tray or on the go with Near Field Communication (NFC) technology. ListenTALK is flexible: Leaders can easily designate one of three participant modes to meet the needs of any venue or setting.

SECURE

It goes without saying that security matters, so each ListenTALK is equipped with proprietary encryption technology to ensure privacy.

RELIABLE

We're serious when we say ListenTALK stands out from the crowd. It uses a unique 1.9 GHz frequency instead of the overcrowded 2.4 GHz frequency to improve reliability and reduce interference.

ListenTALK from Listen Technologies

ListenTALK is a mobile device that both transmits and receives audio, making it the ideal solution for all two way communication needs. Leaders can clearly speak to group participants and allow them to respond with the simple press of a button.

Presenters, leaders, and guides need to communicate clearly without having to shout or whisper. Fielding questions, comments, and collaboration can be difficult in challenging environments. ListenTALK is designed to overcome these challenges and enrich group communication in a variety of applications.

Everything you need to communicate in one device

ListenTALK is a smart two-way communication system existing within a single device. ListenTALK is more than a transceiver, it's an all-in-one device that facilitates communication and collaboration among two or more people in any setting.

Headset Jack
Choose headset/earphone based on noise level or use any smartphone ear bud

Leader Clip
Easy designation for leaders

Internal Mic
Active when no headset detected

Soft Keys
Quickly program participant mode and pair units

Talk Button
Use to facilitate communication

USB Port
Charge and program units individually, or in bulk via docking station

Pair Button
Pair units to Leader with simple push of button

Leader Pocket
Designate leader for simple group pairing

Status Button
Quickly check status of units

USB Port
Connect to software suite to easily program units, manage inventory, and update firmware

A simple, intuitive solution for mobile collaboration

ListenTALK was designed with flexibility in mind and is easily configured with three participation modes.

LISTEN

Participants
in listen
only mode

RESPOND

Participants
can listen
and respond
to leader only

DISCUSS

Participants
can listen and
respond to
leader and group

SYSTEM CONFIGURATION

A ListenTALK system can be easily configured to meet the needs of any setting — small or large, quiet or noisy. Multiple pre-configured systems are available at www.listentech.com/assistive-listening/listentalk, or build your own system to fit your needs.
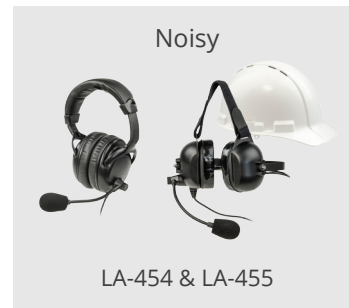

1 Choose Number of Transceivers

LK-1	ListenTALK Transceiver, Single Unit with Li-ion Battery, Breakaway Lanyard, LA-401 Ear Speaker
