Mipro MA708

Portable PA System

The MA708 delivers an impressive 190 watts of power through a two-way speaker system, for outstanding vocal projection and music playback. The MA708 sounds more like a professional grade self-powered speaker than an all-in-one portable PA system.

The MA708 can be optioned for a total of four wireless microphone receivers, as well as the CDM2T CD/MP3 player. Additionally, when the new ACT30Hr wireless handheld microphone is chosen, the master level control of the MA708 can be turned up and down from the microphone.

This powerful PA suits a huge number of applications, from schools and churches, to meetings, seminars and presentations, fitness and aerobics centres, retail promotions, parades and fetes, sports events, emergency interventions, parks and recreation facilities, and public auctions.

Features

- Lightweight Class-D amplifier produces 190 watt audio output
- 1" titanium compression driver and 8" woofer
- 3 power modes: AC, rechargeable battery and DC jack
- Up to 7 hours of operating time per charge
- Retractable handle and sturdy wheels for easy transport
- Built-in storage compartment for 2 transmitters
- Lightweight contoured design: just 16kg
- Optional CD/USB player module (including remote control)
- Up to 4 optional high performance diversity receiver modules with 16 auto-scannable frequencies
- One-touch Autoscan for a clear, interference-free frequency
- One-touch ACT™ syncs the transmitter and receiver frequency automatically
- Interference warning indicator
- MTM90 transmitter option for wireless interlinking of multiple MA708 portables to extend transmission range and expand coverage
- Innovative digital master volume control enables volume to be manually or remotely controlled by an optional Mipro ACT30Hr handheld transmitter microphone instead of a separate remote
- Voice priority feature that mutes the music when mic is used
- Line output for external audio recordings
- 4-segment battery meter for accurate battery reading and charging status
- Integrated rechargeable batteries
- Extension speaker output
- Integrated speaker stand mount
- Suitable for tripod, floor or desk mount
